New Lighting Solutions

Outdoor

Based on the extensive know-how of the technical team at ROVASI for the design of outdoor luminaires, we have developed a new technical-decorative version intended for lighting open spaces.

Backed by more than 20 years of experience in the outdoor lighting sector, our range continues to stand out for its strong durability, capacity to withstand adverse weather conditions and lighting efficiency.

Bringing new style to nocturnal environments is now an option.

Rigel Outdoor

Check out the exclusive light gradient effect on the inside of the lampshade that culminates in the centre.

A design that brings unique style to contemporary spaces.

Finishes for outdoor luminaires

At ROVASI, we are fully aware that the finish used on the body of a luminaire is crucial to guaranteeing durability.

The layer of paint acts as a protective barrier against corrosion, oxidation and chemical agents, preserving the integrity of your luminaire and its service life.

A quality finish improves the overall look and brings style and character to blend the luminaire into your space. The standard finish for outdoor luminaires is the C4 - textured paint. For highly corrosive environments, we can offer an optional C5-M treatment.

LUMINAIRE RAL

- RAL9010
- RAL9005
- RAL7016
- RAL9006
- Corten

Which combination you choose of the various luminaire designs and available colours is limited only by your creativity.

Luminaires for outdoor spaces

- Luminaires with symmetrical light distribution.
- Protection rating against dust and moisture: complete IP65.
- COB protected against harmful mechanical impacts. IK10 silicone optics.
- Silicone optics to control and direct the light.
- Body and lampshade made of aluminium coated with polyester powder along with C4 treatment for corrosion resistance to guarantee further durability. Textured paint finish.
- C5-M special coating for highly corrosive environments is available under request.
- Anticondensation device.
- Temperature resistant rubber gaskets.
- A4 stainless steel locking screw.
- Removable lampshade that can be easily replaced with another design or finish.

Suggested applications: porches, terraces and large spaces as commercial or leisure centres.

A very good solution for high ceilings because it enables the lighting point to be brought close to the activity plane.

Because every space is unique and has its own specific characteristics, including the installation needs, we offer several options so you can choose the one that best suits the requirements of your project.

About ROVASI

At ROVASI, we know the value of lighting.

We have been designing, developing and manufacturing indoor and outdoor luminaires for over 30 years. From our factory in Centelles | Barcelona, we participate in lighting projects over the World. Our products can be found in more than 90 countries on all five continents.

The high quality of our luminaires, their elegant and functional design, a wide range of solutions, our excellent customer care, and a friendly personalised service are the characteristics that distinguish us.

Our company has always prioritised the premium quality and functionality of our products.

The quality of lighting is an extremely important factor in any space. Quality lighting can only be created from quality luminaries.

Our luminaires are the result of meticulous design and the very best materials and components.

Great care is taken during every stage of the process; from initial idea through to the design, development and manufacture of each and every one of our lighting solutions.

All our products are manufactured in Centelles under strict quality control processes guaranteed by ISO 9001:2015 standards for more than 25 years.

Our luminaires and our process are designed to have a low environmental impact.

We guarantee the durability of the luminaires through neutral and timeless designs.

We conduct a rigorous selection of all components to achieve comprehensive quality.

We always seek maximum efficiency through the light sources and drivers we use and diligently design our optics and reflectors.

The main and prioritized materials used when manufacturing the luminaires are recyclable and we also prioritise the use of recycled materials .

Both the light source and the driver are easily replaceable, and the luminaire can be repaired.

At the end of their useful life, our products can be easily disassembled and separated into their component parts for correct recycling of the materials.

We are committed to local production with a network of local suppliers.

To prevent stockpiles of obsolete product, we only work to order.

We actively manage and strive to reduce greenhouse gas (GHG) emissions.

You have an idea, we have the tools.

Flexibility is what enables us to meet the needs of our customers.

Our installations are fully equipped with the necessary resources and the best specialised professionals to take on any custom order.

We can make minor modifications to products that already exist or we can create entirely new ones based on your technical needs and design criteria.

rovasi.com, the tool for excellence

Our range includes over 41,000 luminaires for both indoors and outdoors that can be customised with a range of colour finishes and electronic equipment.

On our website, you can easily and quickly find the best solution for your lighting project. The technical details and necessary documentation and work files are all available so you can easily undertake your lighting study and obtain outstanding results.

We work in synergy with the professionals in the sector.
